Project Status Report

Date: 2026-03-30 **Author**: Project Team **Status**: On Track

Executive Summary

This document demonstrates the PDF conversion capability of the `claude-skill-pdf` skill. It includes common Markdown elements to verify rendering quality.

Key Metrics

Metric	Target	Actual	Status
Conversion Speed	< 5s	2.3s	On Track
CJK Support	100%	100%	Complete
Template Coverage	3	3	Complete
Batch Mode	Yes	Yes	Complete

Features

Template System

The skill supports multiple CSS templates:

1. **report** — Professional report with dark headers and zebra striping
2. **minimal** — Clean, lightweight GitHub-style layout
3. **branded-example** — Branded template with custom footer (visiAI)

CJK Support

中文支持测试：本技能完整支持中日韩字符的PDF输出，包括表格、代码块和引用中的CJK文字。

日本語テスト：テンプレートはCJKフォントフォールバックを含みます。

Code Blocks

```python
def convert_md_to_pdf(input_path, output_path, template="report"):
    """Convert a Markdown file to PDF using pandoc + weasyprint."""
    html = pandoc_convert(input_path, template)
    weasyprint_render(html, output_path)
    return output_path
```

Blockquotes

> This skill was built to solve a common need: converting Markdown documentation to professionally styled PDFs suitable for client delivery.

Next Steps

- [ ] Test with large documents (100+ pages)
- [ ] Add dark theme template
- [ ] Support custom fonts via `@font-face`
